

CITY OF PLEASANT HILL

PLEASANT HILL ROAD IMPROVEMENT PROJECT, PHASE 2

Congratulations!

On May 4, 2020, the City Council awarded the Pleasant Hill Road Improvement Project to the low bidder, Ghilotti Bros., Inc. Work is expected to begin in mid-May and be completed in June 2020.

+++++

In order to complete the surface treatment for Pleasant Hill Road, the project will be done in three phases:

PHASE I (May 18 – May 28, 2020)

Phase I will include utility adjustments, the grinding of the existing asphalt roadway, and base failure repairs.

PHASE II (May 30-31, Saturday and Sunday)

Phase II will recycle 3” of existing asphalt pavement, by pulverizing, mixing the material with cement and water, and recompacting the material into a strong durable base. Phase II will occur within 24 hours of Phase I completion

PHASE III (June 1 – June 15, 2020)

Phase III will place a new 2 ½” Asphalt Concrete Overlay on the new recycled base material. This phase will occur within 48 hours of Phase II completion. Some work during this phase may occur at night to reduce impacts to residents.

+++++

The Cold-in-Place Recycling (CIR) Process

Phase II: CIR – Recycling the old street section

FDR rebuilds worn out asphalt pavement by recycling the existing roadway. The old asphalt and base materials are pulverized, mixed with cement and water and then compacted to produce a strong, durable base material.

Hot Mix Asphalt Overlay Process

This step involves placing an asphalt concrete overlay on top of the layer of recycled base.

Process/Timing/Notification

If you live in an affected area, you should receive a notice a few days prior to the work. In addition, “No Parking” signs will be posted 48 hours prior to the start of work.

We request that you park your vehicles off the street when work begins. Vehicles left in the street will be towed in order to allow the City to treat the entire pavement surface. It is recommended, if you need to leave your house for any reason during the day when work is scheduled, that you park your cars on a side street or an area not scheduled for street work. We understand that this may be an inconvenience and appreciate your cooperation in advance.

To and from home: Observe lane and street closures, posted speed limit signs and signs indicating delays during each phase of construction.

We wish to call to your attention the following precautions to help us perform a better quality job and protect you, your family, and your property.

Please help by following these precautions:

- ***Keep your children and pets away from the street while we are doing these treatments. Several large pieces of equipment are involved.***
- ***Drive slowly; the recycled surface may be uneven until the asphalt concrete top layer is placed.***
- ***Warn your children to be careful while riding their bicycles. It would be preferable if they refrained from riding altogether until the work is completed.***
- ***Continue to park your car off the road or until the asphalt concrete top layer is placed***

CITY OF PLEASANT HILL
NOTICE OF PLEASANT HILL ROAD IMPROVEMENT PROJECT

- ***Respect Construction Areas and Workers: Do not drive on the treatments, cross over closed lanes to access or exit your driveway. This will result in damage to your car.***

We thank you in advance for your patience and cooperation

Please contact Ann James with our Engineering Division at (925) 671-5244 if you require assistance with a specific need or have any additional questions or concerns. Also call if there are any concerns during construction so that we may resolve them as quickly as possible.
